

AMPLIFI

Appreciating Milestones, Performance,
Leadership and Impact through Faculty Insight

(Academic Analytics Insight Suite)

Department Head Development Series

October 7, 2026

Transition from Interfolio P&T and F180

The Interfolio contract ends July 2027 — here is what changes and what stays

Contract — ends July 2027

- The university's Interfolio contract ends in July 2027
- Current Interfolio Promotion & Tenure and F180 will transition out
- Planning and migration work is underway now

Replacing — AMPLIFI

- **One central platform supports dossiers, CVs, and reporting**
- The Academic Analytics Faculty Insight suite (**AMPLIFI**) replaces:
 - Interfolio Promotion & Tenure
 - Faculty180

Continuing — Faculty Search

- We will continue to use Interfolio Faculty Search
- Recruitment and hiring workflows are unchanged

The university no longer requires the use of F180 for faculty evaluation.

AMPLIFI: A More Connected View of Faculty Work

AMPLIFI will bring faculty information, processes and opportunities into a more connected environment.

Reduce fragmentation

by bringing information currently housed across multiple systems and sources into one faculty profile.

Give faculty greater visibility and control

over their information, including choices about what information is visible and to whom.

Support faculty success

by making achievements, expertise and professional development opportunities easier to identify.

Strengthen connections

among faculty, collaborators, awards opportunities and institutional support.

The goal is not simply to collect faculty data — it is to make that information more useful to faculty and the people who support them.

How AMPLIFI Supports Faculty Careers

Designed to reduce burden, increase visibility and open opportunities

Less time on paperwork

Information pulled from existing sources means less re-entering the same material for review cycles.

One profile, many uses

The same record supports promotion and tenure, annual evaluation and CV-level accomplishments.

Faculty work, recognized

Achievements and expertise become easier for leadership and the university to see and celebrate.

New collaborators

Expertise is discoverable, making collaborators easier to find within and beyond Texas A&M.

Awards and funding

Honorific award and funding opportunities can be matched to faculty record and interests.

Better support from leaders

Department heads are better equipped to mentor, develop and advocate for their faculty.

Faculty keep access to and control over their information — the goal is to automate where possible, not add work.

AMPLIFI Implementation Roadmap

A phased implementation: build, validate, then expand

Phase 1

Go-Live: January 1, 2027

Promotion & Tenure

- Defined process with a limited user group
- College and school P&T staff, department heads, deans and Faculty Affairs
- 2027-28 P&T cycle: go live

Phase 2

Target: Fall 2027

Faculty Activity Reporting

- Broader availability of faculty profiles
- Confirm data accuracy and working integrations
- Structures must appropriately represent faculty work

Phase 3

Target: January 2028

Annual Faculty Evaluation

- Launch annual evaluation using validated data
- Templates reflect disciplinary differences

Running throughout: data migration and integration, authoritative source mapping, data validation, and evaluation templates developed with faculty and academic leaders.

AMPLIFI Steering Committee

Faculty Affairs

Blanca Lupiani — Chair
Vice Provost, Faculty Affairs

Robyn Blackmon
Director of Communications, Faculty Affairs

Patricia Klein
Executive Associate Dean, AgriLife Sciences

Leonardo Cardoso
Associate Dean for Faculty Affairs, PVFA

TBD
Faculty Advisory Council

Tiffany Wade
Program Director, Technology Services

Academic/Faculty leadership

Heather Wilkinson — Co-Chair
Associate Provost, Faculty Affairs

Royce Stengele
Senior Faculty Affairs Coordinator, Faculty Affairs

Ramesh Vemulapalli
Executive Associate Dean, Veterinary Medicine & Biomedical Sciences

Kristi Sweet
Department Head, Arts & Sciences

David Cairns
Professor & Faculty Fellow, Data Management

Tony Miles
Director, Technology Services

Technology & data

Kathy Beladi
Director, Faculty Affairs

Heather Lench
Senior Associate Provost, Office of the Provost

Jason Huntley
Senior Associate Dean, College of Medicine

Scott Schaefer
Department Head, Engineering

Michelle Mitchell
Chief Data Management Officer

Kevin Kraeft
Senior Lead Software Developer, Technology Services

The Steering Committee sets overall direction and reviews progress.

AMPLIFI Working Group

Jennifer Holle
Executive Director, Arts & Sciences

Tony Miles
Director, Technology Services

College administration

Heather Wilkinson — Co-Chair
Associate Provost, Faculty Affairs

Royce Stengele
Senior Faculty Affairs Coordinator, Faculty Affairs

Cari Bishop Smith
Director of Academic Affairs, TAMUG

Kevin Kraeft
Senior Lead Software Developer, Technology Services

Technology & data

Kathy Beladi
Director, Faculty Affairs

Katelyn Davis
Communications Specialist, Faculty Affairs

Tiffany Wade
Program Director, Technology Services

The Working Group supports the day-to-day build and configuration.

Your Role in Building AMPLIFI

Help us build it for the way faculty and our academic units actually work.

Represent disciplinary differences — in faculty activity and evaluation.

Validate requirements and workflows — before broad implementation.

Respond to requests for input — from steering committee representatives, associate deans and the implementation team.

Help faculty understand the purpose — of AMPLIFI as the platform develops.

Identify what works and what does not — while changes can still be made.

Engagement now helps shape the system you and your faculty will eventually use.
